

Introduction

Doctors 4 Indigenous is a club of medical professionals practicing a special form of "voluntourism" delivering free health care to Mexico's rural poor while gaining access to remote, yet beautiful tropical beaches. After years of service working out of meager accommodations, we are now participating in a network of exclusive sanctuaries at the most beautiful beaches of Michoacan and Colima.

Each property is gently sited upon the pristine natural environment and designed as a luxury base camp from which to embark on explorations of Mexico's wild coast and experience the unique culture of these seaside villages.

Several of these remote locations are accessible only by boat, and are familiar to us now after 30 years of exploration in the area.

Each location has been carefully chosen with three thoughts in mind;

1. Remote Beauty
2. Unique Cultural Experiences
3. Nature-Based Recreation.
